Look here for help choosing a product :

www.alesi.com

<http://designmuseum.org>

Task one – choose a product to model then produce an a4 picture of it (this can be a drawing from a book or magazine or a print out)

Task two – produce a 3d model of the product using appropriate materials. Your model is limited to a size 30cm by 30cm by 30cm this is because of limitations on display space. If this is going to be a huge problem for you to produce a quality product with this restriction please speak to Miss Knowles as soon as possible.

Task Three – produce a Tag for your product and attach it to your product somehow. The tag should state what the product is, Who designed it, some interesting/our reasons for choosing the product / your name /year group / technology group and teachers name.

DESIGN	
Information	
Designers name present	
Products name present	
Interesting facts about the product	
A statement explaining why you decided to model this design	
Presentation	
An excellent model using appropriate materials	
A well presented model using appropriate materials	
Satisfactory presentation	
Presentation is below the standard required	
Targets	
Ensure you show of all the information you know about a product with detailed answers	
Try to include more interesting information like country of origin price etc	
Make sure you read the task carefully and cover all the required areas	
Use more appropriate materials to model your work in the future	
Complete all aspects of your LLP	
In the future research your own idea rather than using a suggested ones	
Remember to justify your choices and ideas by giving your opinions	
At!:	M H S X

Example models – you could use straws, plasticine, papier-mâché, clay, textiles, wood, Fimo, lolly sticks, card etc to manufacture your quality model

Work is to be handed into your teacher, in the event that your teacher isn't available it should be handed to Mr Peters or Miss Francis in the Prep room. It will always require **your name /year group / technology group and teachers name to be on it.**
